

RAISED SUBSTRATE

MIRROR IMAGE SURFACE

UV, CHEMICAL, AND ABRASION RESISTANCE

INTRODUCING

REFLECTS-D™

Your company's image is a reflection of your innovative products, ingenuity, hard work, and commitment to excellence. When you use **REFLECTS-D™** material from Prime Source, Inc., your image reflects right on you – literally.

REFLECTS-D™ Product Family

Adhesive backed mirror silver nameplate material that provides you with the best in decoration and durability.

RD467

Designed for adhesion to high-surface energy substrates such as metals, enamel paints, and ABS plastic.

RD468

Designed for similar applications as RD467, but also includes application to heavily textured surfaces.

RD9671 LE

Designed for adhesion to low-surface energy surfaces such as polyethylene, polypropylene and powder-coated paints.

RD9672 LE

Designed for similar applications as RD9671, but also includes applications to heavily textured surfaces.

Features

- Mirror image reflection
